# ADVANCED INTERACTIVE CONTROL OF YOUR LOADING DOCK EQUIPMENT

## ADVANCED 3-COLOR LIGHT COMMUNICATION

Compared to other standard green and red systems, iDock Controls utilize an additional third amber light if a fault is detected or restraint is in bypass mode.

## OPERATOR INTERFACE

Using membrane dome button technology, operators can clearly feel and hear when they press a button, confirming that the equipment will begin operation.

## INTERACTIVE MESSAGE DISPLAY INCLUDES:

### EQUIPMENT INFORMATION

Access information about your dock equipment, including the serial number, installation date, and the door number.

### SYSTEMS INFORMATION

View detailed information regarding your installed dock equipment and the options that are currently active.

### MAINTENANCE HISTORY

See all of your maintenance records as well as schedule a maintenance reminder that will alert you when the scheduled day has come.

### COUNTERS

View your loading dock equipment statistics, such as cycle counts, optional forklift activity, faults, and more.

## INTEGRATED CONTROLS

iDock Controls integrate your installed McGuire dock levelers, vehicle restraints, and other dock accessories, as well as door operators. Interlocking equipment controls provides a sequence of operation for your dock equipment, improving safety and energy efficiency.

**Boost Productivity | Simplify Maintenance | Prioritize Safety | Tighten Security**
