MA Series Air-Powered Leveler

Specification Sheet & Submittal

25K - 50K CIR

6' - 7' WIDTH **6' - 10'** LENGTH

General Description

All McGuire MA Series Dock Levelers incorporate the use of a low pressure, high volume air system to raise and lower the platform. A single push button activates the air power system to raise the leveler and extend the lip. Systems, LLC is an active member of Loading Dock Equipment Manufacturers (LODEM), a product section of the Material Handling Industry. Unit conforms to OSHA, U.S. and is manufactured in compliance with the American National Standard of Safety Performance and Testing of Dock Leveling Devices (ANSI) MH 30.1. Unit manufactured by McGuire.

Construction

The platform is constructed of 1/4" thick 4-way high strength, low alloy 50,000 minimum yield A572 safety tread plate. Platform is reinforced and supported by full length 6" height "C" channels for 25,000 lb CIR to 40,000 lb CIR units, full length 6" height structural channel for 45,000 lb CIR units and full length 6" height structural channel and I beams for 55,000 lb CIR units, all welded to deck for firm structural support. Front and rear header plate is 1/2" thick x 7" high hot rolled steel. McGuire MA series lips are 4-way safety tread plate, the 25,000 lb CIR is 1/2" thick and the 30,000, 35,000, 40,000 lb CIR are 1/2" thick and the 45,000 lb, 55,000 lb CIR units are 1/2" thick. The standard lip length is 16" on all capacities. Hinge tubes are 1/2" OD x 1/2" wall, 1/28" OD x 1/28" wall or 2 1/28" OD x 1/29" wall depending on CIR. All lip hinge pins are 1" diameter M1044 steel. Steel header gussets are standard on all models 1/29,000 lb CIR and above. All units have grease fittings as standard. All platforms are designed to compensate for up to 1/29 of canted trailer bed.

Operation

The MA Series Leveler is controlled remotely from a wall mounted control panel. Arrays of optional control panel features are available. Leveler platform is raised by an electric blower motor filling an air bladder which provides upward lift of the platform. The lip is extended and secured in place with a positive lip extension mechanism. Releasing the raise button allows the platform to float downward to the truck bed. No manual lifting is required. Leveler will automatically float with trailer movement. To store leveler with trailer in place push operate button till leveler starts to rise and lip falls pendant. Release operate button and leveler will float down into lip keepers. Elevated, frame mounted air bladder assembly keeps clear of debris that may accumulate in the pit. Service range is from 12" above to 12" below dock level. Lip keepers provide nighttime security and cross-traffic support. Full operating range toe guards are provided as standard. Maintenance prop with "Lockout/Tagout" capability is provided as standard. Factory finish includes rust inhibitive slate blue coat industrial grade finish. For special coating and colors are optional.

Safety Equipment

Pivoting cross traffic legs of solid steel bar construction provide multi position safety at dock level and below. Self contained lip control yields under impact from incoming trailer. Leveler is equipped with built-in maintenance prop with "Lockout/Tagout" capability; full range toe guards and night lock security. MA series can be equipped with UniChock™, UXL, STOP-TITE®, TPR®, or TPR® UniLock series vehicle restraint devices or Light Communication System signs and lights.

Colors

Levelers painted slate blue. Other colors are available. Consult factory.

Dock Bumpers

Two black laminated 4" thick \times 10" H \times 14" W bumpers as standard. Optional sizes and types are available.

Vehicle Restraint Systems

McGuire MA Series air powered levelers can be equipped with an optional UniChock, UXL, STOP-TITE, TPR, or TPR UniLock series vehicle restraint or a Light Communication System to help prevent unexpected trailer departure from the loading dock and minimize trailer creep during the loading/unloading process and to enhance communication at the dock area.

Electrical

Electric blower motor shall be 115v single phase, 1400 watt drawing 11 amps at startup. Electrical control panel is non-metallic Nema 4 enclosure. All electrical components, connections and wiring are UL listed or recognized. Please Note: Unless specifically noted on question all electrical requirements are the responsibility.

quotation, all electrical requirements are the responsibility of others.

Warranty

All McGuire MA Series models feature a full one (1) year base warranty on all structural, pneumatic and electrical parts, including freight and labor charges in accordance with McGuire's Standard Warranty Policy. The lifting system, including air bladder, seals, hoses and motor carry an additional full four (4) year warranty on parts. Structural components also carry an additional full four (4) year pro-rated warranty. McGuire warrants all components to be free of defects in materials and workmanship, under normal use, during the warranty period. This base warranty period begins upon the completion of installation or the sixtieth (60th) day after shipment, whichever is earlier. Additional warranty extensions may be available upon approved submittal of application information.
