

RF Dock Shelter

UP TO 12'
WIDTH

UP TO 12'
HEIGHT

Nova Rigid Series Dock Shelter—provides maximum dock protection and full access to trailers while minimizing pressure on the building wall. The RF Series features high wear-resistant fabric with double lock-stitched seams, bottom corner draft pads, protective corner reinforcement pleats, wind retention straps and a 36-inch drop head curtain with fiberglass stays. The raked header with translucent fiberglass top provides natural light, permits water drainage, and provides snow load support.

FEATURES

- Side and head frames are made of pressure-treated, kiln-dried wood
- Frames are covered with translucent fiberglass
- Aluminum angle face edging
- Available in several top-grade fabric types, weights and colors
- Vinyl-covered foam drop-in style draft pads
- 24" shelter projection
- Steel supported bumpers (black)
- Heavy-duty galvanized mounting hardware
- All sew lines are lock-stitched and reinforced with UV-resistant thread
- 15" yellow guide stripe

OPTIONS:

- Full-height yellow guide stripes
- Custom height, projection and head curtain
- 2" foam-filled front head curtain
- Pull rope for head curtain
- Hook and loop splits on head curtain
- Frame cut-outs for obstructions
- Non-projecting frame
- Common member units
- Ground-level units
- 18-oz white vinyl on frames
- Galvanized steel frame
- Chain-weighted drop curtain
- Spring steel stays

Dock Shelters
Maximize Energy Savings. Protect Freight. Improve Safety.

Seals and shelters turn your loading dock into a safer, more efficient, and more secure environment — with a measurable return on investment.

BUILT FOR PERFORMANCE

At McGuire, we combine skilled craftsmanship, thoughtful design, and premium materials to create high-quality dock seals and shelters. Our products are built to fit your facility's unique needs — including vehicle type, door size, dock height, traffic levels, and weather conditions.

Through our nationwide McGuire dealer network, we ensure every system is custom-fit to your dock for optimal performance and long-term value.

OPERATION & PERFORMANCE

Dock shelters offer a durable and versatile solution for sealing the space between a building and a parked trailer—while allowing full, unobstructed access to the truck's interior. Ideal for larger door openings or when servicing a variety of trailer types, truck shelters improve environmental control, enhance safety, and support more efficient loading and unloading operations.

SAFETY & SECURITY

- A sealed loading dock is a safer, more secure dock. Dock shelters help prevent:
• Employee discomfort due to drafts or weather
• Energy loss through open gaps
• Theft and unauthorized access
• Product damage or contamination
• Insect infiltration
• Slippery or hazardous surfaces caused by rain or snow intrusion

STRUCTURAL QUALITY

McGuire dock shelters are built for performance. They feature a rigid frame with durable head and side curtains, reinforced with fiberglass stays. Constructed with top-grade industrial fabrics in various weights, colors, and types, these curtains resist wear from repeated trailer contact.

DOCK SHELTER KEY BENEFITS
Maximum Energy Savings
Exceptional Versatility
Cost Effective
Rugged & Durable

SELECTION CRITERIA

Choosing the right sealing system is essential for safety, productivity, and long-term performance.

Table with 2 columns: Grade of Approach, Door Size, Dock Height, Dock Bumper Projection, Wall Structure. Includes a vertical 'CONSIDER' label on the left.
